Sanup Purushothaman Nair

Head of IT Operations & Infrastructure | Acting CISO | Cloud
& Cybersecurity Governance | Azure | ISO 27001 | Digital
Transformation | 19+ Years Enterprise IT @ iPUMPNET®
Bengaluru, Karnataka, India

Summary

Head of IT Operations & Infrastructure | Acting CISO | 19+ Years in Enterprise IT, Cloud & Cybersecurity Governance I lead enterprise IT as both a strategic function and an operational engine — ensuring infrastructure is resilient, security is embedded, and technology actively enables business growth. Over 19+ years, I have directed end-to-end IT operations across multi-site corporate environments, owning everything from hybrid cloud platforms and enterprise infrastructure to cybersecurity governance, ITSM, vendor management, business continuity, and digital transformation programmes. What I've delivered: 20% IT cost reduction through vendor renegotiation, procurement strategy, and infrastructure rationalization 40% improvement in system availability via SLA-driven service delivery and proactive monitoring 30% operational efficiency gains through process automation, ITSM adoption, and governance frameworks Zero critical security incidents over 6+ consecutive years as Acting CISO ISO 27001 ISMS implemented end-to-end — gap analysis, risk register, 20+ policies, SoA, and internal audit readiness Sub-4-hour RTO achieved through structured BCP/DR design and regular testing Built iAssets — an enterprise ITAM/ITSM platform (React, Node.js, PostgreSQL) saving 15+ hrs/week and reducing ticket resolution by 35% My expertise spans: Microsoft Azure (Global Admin) · Azure AD / Entra ID · AWS · Microsoft 365 · Intune · Fortinet FortiGate · SIEM & Log Correlation · IAM/PAM (RBAC/MFA) · Vulnerability Management (Nessus, OpenVAS) · Zero Trust Security · ISO 27001 ISMS · NIST CSF · GRC · LAN/WAN Infrastructure · Windows Server & Linux · Virtualization · BCP/DR · ITSM · IT Budgeting & Vendor Management What drives me: I believe IT leadership is about more than keeping the lights on. It's about building infrastructure that scales, governance that protects, and systems that give organizations a genuine competitive edge. I bring both the strategic

perspective to shape technology roadmaps and the hands-on depth to deliver them.

Experience

Delhi Waste Management | iPUMPNET®

Senior Manager – IT Infrastructure & Operations and Acting CISO

February 2018 - Present (8 years 4 months)

Bangalore Urban

Head of IT & Acting CISO — directing enterprise IT operations across multi-site environments, covering cloud platforms, cybersecurity governance, ITSM, digital transformation, and IT strategy.

IT Operations & Infrastructure

- Managed hybrid infrastructure — Windows Server, Linux, LAN/WAN, Azure & AWS — as Azure Global Administrator
- Governed M365, Azure AD/Entra ID, SharePoint, Intune & cloud security policies
- Owned full IT budget lifecycle — delivered 20% annual cost reduction
- Led BCP/DR design achieving sub-4-hour RTO
- Drove ITIL-aligned service delivery, change management & vendor governance

Key Achievements:

- 20% IT cost reduction
- 40% improvement in system availability
- 30% operational efficiency gains
- Zero critical security incidents — 6+ consecutive years
- Sub-4-hour RTO — BCP/DR frameworks maintained organisation-wide

Digital Transformation:

- Built iAssets — enterprise ITAM/ITSM platform (React, Node.js, PostgreSQL); saved 15+ hrs/week, reduced ticket resolution by 35%
- Developed iMinutes — meeting & workflow automation platform
- Introduced AI-assisted development workflows

Security & Governance:

- Acting CISO — accountable for cybersecurity governance, risk management & regulatory compliance

- Led ISO 27001 ISMS end-to-end — gap analysis, risk register, 20+ policies, SoA & audit readiness
- Administered Fortinet FortiGate; deployed SIEM monitoring
- Implemented Zero Trust IAM/PAM framework across Azure & AWS

Mahalekshmi Silks

Systems Administrator

April 2017 - January 2018 (10 months)

Kerala, India

Managed end-to-end IT infrastructure and systems administration for a multi-branch retail organization, ensuring continuous availability of business-critical systems and network services.

- Administered Windows Server environments, Active Directory, DNS/DHCP, and endpoint systems across multiple locations
- Managed LAN/WAN network infrastructure, switches, and inter-branch connectivity
- Implemented backup and recovery procedures, patch management, and endpoint security protocols
- Handled IT procurement, hardware asset management, and vendor coordination
- Provided IT support and training to staff across departments, maintaining system uptime and minimizing business disruption
- Monitored system performance and resolved infrastructure issues proactively to ensure operational continuity

Bader Al Janoub General Hospital, KSA

Network Administrator

May 2011 - July 2015 (4 years 3 months)

Najran, Saudi Arabia

Managed complete IT and network infrastructure for a Ministry of Health hospital facility serving clinical and administrative operations across a 24/7 critical healthcare environment.

- Maintained 99%+ network uptime across clinical and administrative departments in a mission-critical healthcare setting
- Led end-to-end LAN/WAN infrastructure deployment for a major hospital expansion — structured cabling, equipment procurement, commissioning, and full go-live support
- Administered Fortinet FortiGate firewall (VPN, IDS/IPS, access

rules, firmware management); implemented IAM, RBAC, endpoint security, and patch management

- Supported clinical systems, Windows Server 2003/2008 R2, and Exchange Server 2003 — ensured zero disruption to patient-facing operations during infrastructure upgrades
- Maintained IT documentation, delivered staff IT training, and managed hardware procurement and asset inventory across the facility

HI-TECH Systems & Services

Computer Hardware Engineer

July 2007 - November 2010 (3 years 5 months)

Kerala, India

Provided IT hardware support, maintenance, and technical services to small and medium businesses across the local area — covering offices, retail shops, and small enterprises.

- Diagnosed and repaired hardware faults across desktops, laptops, printers, and peripheral devices
- Installed and configured Windows operating systems, office software, and basic networking components
- Set up and maintained small office LAN infrastructure including switches, routers, and shared printers
- Provided on-site IT support and troubleshooting to local business clients across multiple sectors
- Managed hardware inventory, spare parts, and client equipment records

Education

Mangalore University

Bachelor of Science · (June 2004 - March 2007)

ECIT Computer Training Institute Ahmedabad

Diploma in Hardware and Networking, Information Technology · (March 2016 - March 2017)
