

SANUP P NAIR

Head of IT Operations & Infrastructure

Cloud Infrastructure | Cybersecurity Governance | Digital Transformation

Bangalore, India | +91 96563 18678 | nair7229@gmail.com | linkedin.com/in/sanup-p-nair

PROFESSIONAL SUMMARY

Senior IT Leader with 19+ years of progressive experience directing enterprise IT operations, infrastructure modernisation, cloud transformation, cybersecurity governance, and digital enablement across multi-site corporate environments. Proven ability to align technology strategy with business objectives while driving operational resilience, service excellence, and cost optimisation.

Experienced in owning end-to-end IT functions spanning enterprise infrastructure, hybrid cloud platforms, IT service delivery, cybersecurity governance, vendor management, business continuity, and digital transformation programmes. Combines strategic leadership with hands-on expertise across Microsoft Azure, AWS, enterprise networking, ITSM, and compliance frameworks including ISO 27001 and NIST CSF.

Recognised for delivering measurable outcomes: 20% IT cost reduction, 40% improvement in system availability, and 30% operational efficiency gains through governance frameworks, automation, and service optimisation. Brings additional depth through enterprise application development and ISO 27001 ISMS leadership as Acting CISO.

LEADERSHIP HIGHLIGHTS & KEY ACHIEVEMENTS

- **20% IT Cost Reduction:** Owned full IT budget lifecycle — vendor renegotiation, procurement strategy, contract governance, and infrastructure rationalisation — delivering sustained annual savings.
- **40% Improvement in System Availability:** Directed enterprise IT operations across multi-site environments; implemented SLA-driven service delivery, proactive monitoring, and structured escalation frameworks.
- **Enterprise ITAM & ITSM Platform:** Designed and built a production-grade platform (React, Node.js, PostgreSQL) for asset lifecycle management, SLA workflows, and audit-ready reporting — saving 15+ hrs/week; reduced ticket resolution by 35%.
- **Zero Critical Security Incidents:** 6+ Years - Maintained through SIEM monitoring, MFA/IAM enforcement, vulnerability management, and staff security awareness as Acting CISO.
- **ISO 27001 ISMS Implementation:** Led full lifecycle — gap analysis, risk register, 20+ policies, SoA, staff training, and internal audit readiness. Certification in progress.
- **Cloud & Governance Leadership:** Led hybrid cloud transformation (Azure Global Admin, AWS, M365); established BCP/DR frameworks achieving sub-4-hour RTO; served as strategic IT advisor to senior leadership on infrastructure, cybersecurity, and technology investment.
- **30% Operational Efficiency Gains:** Delivered through process automation, ITSM adoption, helpdesk restructuring, and IT governance frameworks aligned with business continuity objectives.

CORE COMPETENCIES & TECHNOLOGY STACK

- **IT Operations & Service Management:** IT Operations Leadership · Multi-site IT Management · ITIL-aligned Service Delivery · ITSM · SLA Management · Change Management · Problem Management · Helpdesk & Escalation
- **Infrastructure & Networking:** LAN/WAN Design & Management · Windows Server & Linux · Active Directory · DNS/DHCP · Virtualisation · Patch Management · Endpoint Management & EDR · BCP/DR (sub-4-hour RTO)

- **Cloud & Digital Transformation** — Microsoft Azure (Global Administrator) · AWS · Microsoft 365 · Exchange Online · SharePoint · Intune · Azure AD · Microsoft Defender for Cloud · Hybrid Cloud · Cloud Migration · Cloud Security
- **Security & Governance** — ISO 27001 ISMS · NIST CSF · Zero Trust Security · IAM/PAM (RBAC) · SIEM & Log Correlation · Vulnerability Management (Nessus, OpenVAS) · Fortinet FortiGate (VPN, IDS/IPS) · GRC · Third-Party Risk Management
- **Leadership & Strategy** — IT Governance · Technology Strategy & Roadmaps · IT Budgeting & Cost Optimisation · Vendor Management · Operational Resilience · Digital Transformation · Stakeholder Management · Team Leadership
- **Development & Automation** — React · Node.js · PostgreSQL · REST APIs · Python · AI-assisted Development · Workflow Automation

PROFESSIONAL EXPERIENCE

Senior Manager — IT Infrastructure & Operations | Acting CISO *February 2018 – Present*
Delhi Waste Management | Pump Academy – iPUMPNET® • Bangalore, India

IT Operations & Infrastructure Leadership

- Directed enterprise IT operations and infrastructure services across multi-site corporate environments, ensuring SLA-driven service delivery, operational resilience, and continuous availability of critical business systems.
- Owned the IT budget lifecycle, technology roadmap, hardware refresh cycles, and procurement strategy; delivered 20% annual cost reduction through vendor renegotiation and infrastructure rationalisation.
- Designed and managed hybrid IT infrastructure spanning on-premises servers (Windows Server, Linux), LAN/WAN networks, and cloud platforms (Azure, AWS); served as Azure Global Administrator governing M365, Active Directory, SharePoint, and cloud security policies.
- Established IT governance frameworks integrating operations, cybersecurity, business continuity, and compliance — aligning technology delivery with strategic business objectives across all divisions.
- Drove ITIL-aligned service delivery improvements through structured change management, SLA-driven helpdesk, tiered escalation processes, and regular service performance reviews.
- Managed all vendor and supplier relationships across hardware, software, managed services, and cloud providers — ensuring SLA adherence, contract compliance, and value optimisation.
- Led business continuity planning and disaster recovery design, achieving a sub-4-hour RTO; conducted regular DR tests and maintained updated BCP documentation organisation-wide.

Digital Transformation & Platform Development

- Designed and built iAssets — an enterprise ITAM/ITSM web platform (React, Node.js, PostgreSQL) delivering full asset lifecycle management, SLA workflows, escalation management, and audit-ready compliance reporting; saved 15+ hours/week and reduced ticket resolution time by 35%.
- Developed iMinutes — a structured meeting management platform for agenda creation, live minutes capture, action item tracking with owners and deadlines, and automated email follow-up reminders (in active development).
- Introduced AI-assisted development workflows to accelerate internal platform delivery, operational automation, and solution prototyping while maintaining enterprise-grade quality and security standards.
- Evaluated and implemented emerging technologies to enhance operational efficiency, collaboration, governance, and business scalability across all departments.

IT Security, Governance & Compliance

- Served as Acting CISO, accountable for enterprise-wide cybersecurity governance, risk management, security architecture, and regulatory compliance across all business units and cloud environments.
- Led ISO 27001 ISMS implementation from initiation to internal audit readiness — gap analysis, risk register, Statement of Applicability, 20+ security policies, and staff awareness training.

- Administered Fortinet FortiGate firewall (VPN, IDS/IPS, rule governance, firmware management); deployed SIEM-driven monitoring with real-time log correlation; maintained zero critical security incidents over six consecutive years.
- Implemented Zero Trust-aligned IAM/PAM framework (RBAC, MFA, PAM) and governed cloud security posture across Azure and AWS using native security tools and conditional access policies.

Systems Administrator

April 2017 – January 2018

Mahalekshmi Silks • Kerala, India

Network Administrator

May 2011 – July 2015

Bader Al Janoub General Hospital (Ministry of Health, KSA) — Saleh Al Salamah & Partner Co.
Najran, Saudi Arabia

- Managed the complete IT infrastructure for a Ministry of Health hospital facility across clinical and administrative departments, maintaining 99%+ network uptime in a 24/7 critical healthcare environment.
- Led end-to-end LAN/WAN infrastructure deployment for a major hospital expansion project — structured cabling, equipment procurement and commissioning, and full go-live support.
- Administered Fortinet FortiGate firewall (VPN, IDS/IPS, access rules, firmware); implemented IAM, RBAC, endpoint security, patch management, and backup regimes.
- Supported clinical systems, Windows Server 2003/2008 R2, and Exchange Server 2003; ensured zero disruption to patient-facing operations during infrastructure upgrades.
- Maintained IT documentation, delivered staff IT training, and managed hardware procurement and asset inventory across the facility.

Computer Hardware Engineer

July 2007 – November 2010

HI-TECH Systems & Services • Kerala, India

KEY PROJECTS & INITIATIVES

iAssets: Enterprise ITAM & ITSM platform developed using React, Node.js, and PostgreSQL supporting asset lifecycle management, SLA workflows, escalation tracking, and compliance reporting.

iMinutes: Meeting Management & Workflow Automation Platform — *In Development*

ISO 27001 ISMS Implementation — ISMS implementation including risk assessment, SoA, policy development, awareness training, and audit readiness.

EDUCATION, CERTIFICATIONS & LANGUAGES

Bachelor of Science — Mangalore University, Karnataka

2007

Diploma in Hardware & Networking — Thiruvalla, Kerala

Certifications — Awarded

CCNA: Cisco Certified Network Associate, Microsoft Certified Professional (MCP), RHCSA — Red Hat Certified System Administrator, Certified Python Programmer, Certified AI Generalist

In Progress / Planned

- CEH v13 with AI — Expected June 2026
- ITIL 4 Foundation — Planned July 2026
- CISM — Certified Information Security Manager — Planned 2026
- ISO 27001 Lead Implementer — Planned
- Microsoft Azure Administrator Associate (AZ-104) — Planned

Languages

Malayalam (Native), English (Proficient), Hindi (Proficient), Tamil & Kannada (Conversational), German A2
